Subject Re: Silver Creek spill 

United Park City Mines, to some degree, was responsible, but other companies were actually doing the work under some type of agreement. Call Kerry Gee, UPCM Vice President, 435 655 7407 for more info.

Don't know volume. Kerry might.

There was probably some immediate cleanup and response, don't know scope, but creek is still the focus of EPA cleanup efforts. Kerry may know details on response.

Subject: Silver Creek spill

Hi Jim -

I am trying to track down some information concerning a "spill" of tailings into Silver Creek, Park City, Utah back in 1975. From the little information I do have, I understand that a citizen reported (I believe to the Health Department) three incidents of tailings dumping into Silver Creek during April and May of 1975. From here, I am unclear, but in 1976, EPA was involved and settled a monetary fine against the company.

Would you be able to point me in the right direction as to where I may find out the following:

1. Who was the responsible party for the tailings spill
2. How much material was spilled
3. Was the creek remediated and when

Thank you for any assistance you may be able to provide.
